

# BLUE CASTLE

## Waterproof PU Flex overall

Ref. 320

### Premium protection in wet environments with Blue Castle PU Flex overall.

The Blue Castle 320 PU Flex overall is manufactured from a stretchable PU material with waterproof welded seams. All stress points are reinforced with metal studs.

The front zip is double ended, providing a zip fly and is protected from water ingress by dual storm flaps with press stud fasteners.

A drop down hood with pull string provides additional protection in excessively wet environments.

The sleeves have inset knitted cuffs. The leg cuffs are adjustable with press studs.

A single chest pocket with stud fastened flap is provided on the outside of the garment.

An elastic waist maintains body shape, minimising loose material, providing a safer garment for use around moving machinery.

The PU material has a soft fabric lining for maximum comfort against bare skin.

Colour	Sizes
